(54) Title: TRACKING AND MONITORING EQUIPMENT WITH SECURITY APPLICATIONS

MONITORING AND CONTROL SYSTEM FOR PFN'S DATA BASE CONNECTION OR WWW.

(57) Abstract

A PROTECTED PRIMARY FOCAL NODE (PFN) is utilized for High (HS) and Medium (MS) security remote control applications (100-107) to remotely control the secure use of machines, equipment and vehicles through various levels of monitoring and remote control systems and networks. The PFN TRAC system (200-204) further integrates and consolidates components and functions for more efficient configurations of hardware, software and firmware to provide accountable remote control and management for man and machine interaction.
